

Uninstalling a Program in Windows 10

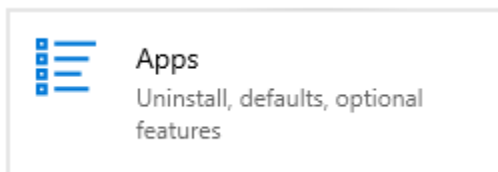

Uninstalling programs that you no longer want can increase space on your hard drive and prevent your computer from getting cluttered.

1. Click on the Windows *Start* button  to bring up the main menu.

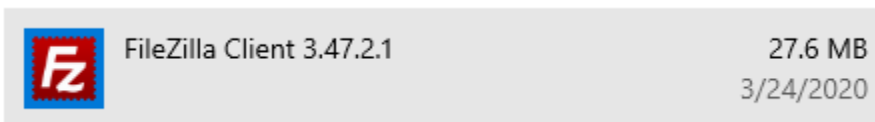

2. In the main menu, scroll to the *S* section and click on *Settings*.

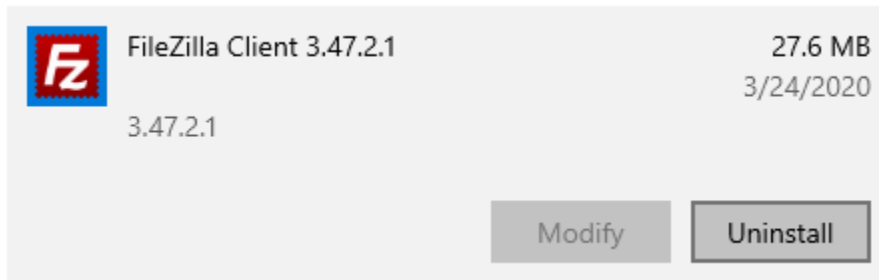

3. In *Windows Settings*, click on *Apps*.

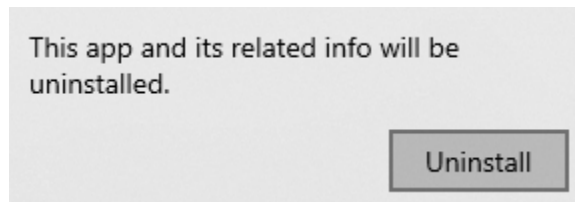

4. In *Apps & features*, scroll down and click on the program that you want to uninstall.

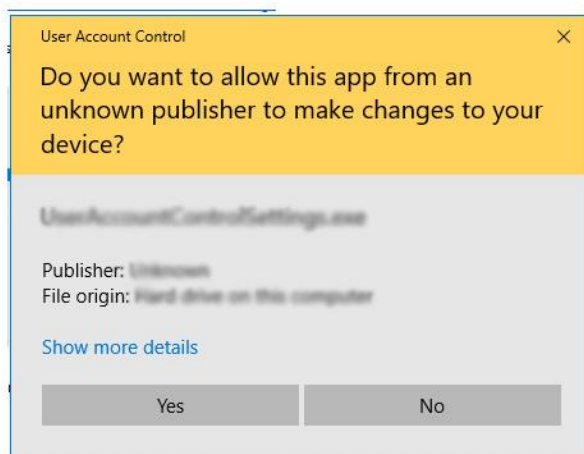

5. Click on the *Uninstall* button.

6. Click on the *Uninstall* button.

7. In the Windows *User Account Control* window that appears, click on *Yes* to allow the program to uninstall.

8. Continue with the program's uninstall instructions to complete the uninstall.
Instruction screens look different for each program.
